Summary

Experienced technician and hands-on problem solver with over 30 years in computers, electronics, and automotive systems. Experienced in fault diagnosis, automobile maintenance, custom PC and electronic builds & electronic circuit design, woodwork, tiling, glass cutting, painting and customer training.

Skills

Designed and developed a complete HTML5 canvas endless-runner game (<https://vincemyz-ux.github.io/Ice-Cream-Birdy/>) with Grok (xAI). Delivered full creative vision, gameplay mechanics, particle effects, and child-friendly UI for my 4-year-old daughter.

Proficient in photo and image editing/customization using Photoshop and GIMP.

Electronics hobbyist: modified amplifiers for increased power output, designed custom circuits, and extensively modified battery-powered remote control cars

Advanced automotive work: engine rebuilds, power & efficiency upgrades, brake maintenance & upgrades, and large high power custom audio installations.

Strong diagnostic and fault-finding across mechanical, electrical, and electronic systems — from vintage DOS-era computers to large commercial modern multi functional copy, print and scanning machines.

25+ years custom PC building, overclocking and advanced cooling solutions.

Wiring of home security camera systems, TV antennas, and installation of large wall-mounted displays.

Expert repair and upgrades of power tools (Milwaukee, DeWalt, Makita, Bosch, AEG) and RICOH photocopiers/printers/scanners/fax machines, and implemented changes that applied in official updates.

Trained small groups of customers on complex RICOH operation, print/scan workflows, and advanced results using Microsoft Office, Adobe Acrobat, Photoshop, and varied paper types.

Diagnosed and resolved customer device, phone, and network configuration issues.

Production of complete bathroom pods/rooms and operation of very large commercial 5 axis CNC machine, working with various types of wood, tile, cement, glass and adhesives.

Selling used commercial appliances and furniture, including performing significant customizations, to used heavy duty commercial use wooden furniture, to match the customer's specifications.

Warehouse operations: scanning, packing interstate deliveries, and forklift use.

Work Experience

18/5/2026 – current

Bennettswood Neighbourhood House

Volunteer Gardener & General Maintenance

Julie Melia 9888 0234

manager@bennettswoodnh.org.au
